FAQ: How Do I Know How Much Water to Apply For?

Question

How do I calculate how much water I need for my application?

Answer

The amount of water you should apply for depends on your **Purpose of Use**. The calculation method is different for different application types.

Livestock Watering

If you are applying for **Livestock Watering**, you can use the **AI Chat Bot** to help estimate your water requirements.

Provide the following information:

• The type of livestock (currently one livestock type at a time)
• The number of animals
• How long the animals will require water during the year

Using this information, the **AI Chat Bot** estimates the quantity of water required for your application.

Irrigation and Other Application Types

For **Irrigation** and all other application types, use the **BC Agriculture Water Calculator** to estimate your water requirements. This is the recommended tool for calculating water requirements for these application types.

Water Fees, Rentals and Charges

If you have questions about water fees, rentals, or charges associated with your application, refer to the **Water Sustainability Fees, Rentals and Charges Tariff Regulation**.

Water Sustainability Fees, Rentals and Charges Tariff Regulation
https://www.bclaws.gov.bc.ca/civix/document/id/complete/statreg/37_2016

Important

Choose the calculation method based on your Purpose of Use. Use the **AI Chat Bot** for Livestock Watering estimates and the **BC Agriculture Water Calculator** for Irrigation and all other application types.
