FAQ: What if My Number of Livestock Changes Each Year? Will My Annual Fees Change?

Question

What should I do if my number of livestock changes each year? Will my annual fees change?

Answer

When completing your water licence application, enter your **best estimate of the number of livestock** and the **amount of water you expect to require** based on your normal or planned operation.

If your livestock numbers vary from year to year, estimate your water quantity using your expected livestock numbers for a typical year.

Your annual water rentals and charges are **not automatically based on the actual number of livestock each year**. Fees, rentals, and charges are determined according to your **authorized water use** and the applicable provisions of the **Water Sustainability Fees, Rentals and Charges Tariff Regulation**.

If you have questions about how annual fees, rentals, or charges are calculated, refer to the regulation below.

Important

When completing your application, always provide your **best estimate** of your livestock numbers and water requirements based on your expected operation.
